

Qualification

- M. Tech (Thermal Engineering)
- B. Tech (Mechanical Engineering)

Practice Focus

Patents Mechanical Engineering

Ayush handles patent drafting and prosecution in the areas of mechanical, automobile, electrical and aeronautical engineering.

Ayush has experience in handling patent matters in wide technology areas of mechanical engineering such as automobile transmission system, automotive steering, HVAC system components like compressors, condensers, pumps, IC Engines, power plant systems, gas turbines, steam turbines, heat exchangers, wind energy systems, solar energy technologies, fuel injection systems, Air Separation Units (ASU), Electric Vehicles (EVs), Thermal Energy Storage (TES) system, nanofluids, exhaust systems, biofuels.

He works with corporate clients, multinationals, MSMEs, start-ups and universities to obtain patent protection in India and internationally.
