### Practice Focus

Mechanical Engineering, Design, Patent & Design Valuation

Devashish is a seasoned mechanical engineer tuned into a patent professional. He handles patent searches, design searches, patent drafting and claim mapping activities for Indian and foreign clients.

His prior experience in various technologies equips him to handle patent drafting and patent prosecution in the area of mechanical, computer aided manufacturing and design, and automobile engineering. In addition, his expertise in computer aided design (CAD) equips him to handle filing and prosecution of design applications/registrations.

Before joining the firm, he worked on various technologies including HVAC and water systems. Besides, he has also worked as a designer previously.
