Practice Focus

Patents (Computers and Electronics)

Jayanthi has been practicing as a Patent professional since 2022. She handles patent drafting, filing, and prosecution in the areas of electronics, instrumentation, computers, communication, and biomedical engineering.

She has experience in handling patent matters in wide technology areas of telecommunications, digital signal processing, image processing, video coding, 4G/5G communications, mobile applications, wired and wireless technologies, semiconductor devices, antennas, sensors and transducers, electric vehicles, artificial intelligence, machine learning, neural networks, Internet of Things (IoT), virtual reality (VR), augmented reality (AR), biomedical instrumentation, and medical devices.

She performs prior art search, patentability, freedom-to-operate and provides opinions on the same.

She also works with corporate clients, foreign clients, foreign associates, multinationals, MSMEs, start-ups, educational institutions and universities to obtain patent protection both within and outside India.
