### Practice Focus

Patents (Biotechnology and Biosciences)

Trupti has more than fourteen years of experience in prosecuting patent applications before the USPTO. She specializes in the areas of biotechnology, life sciences, immunology, pharmaceuticals, chemistry, food, and nutrition. Trupti has drafted, prosecuted, and managed large patent portfolios in these technology areas.

She has drafted and prosecuted several patent applications in diverse technology areas such as liposomal formulations, extended-release formulations, microRNAs, CAR-T cells, otic and intranasal formulations, vaccines, lab-based meat production, plant-based compositions, diagnostic assays, treatment methods, polymer-based additives and paints, solar cell technology, metallurgical inventions such as smelting, steel making processes, coatings for steel substrates, etc.

She regularly advises clients ranging from start-ups, small to mid-size companies, and academic institutes on strategic development of patent portfolios. Trupti also advises clients on patentability, freedom to operate, technology landscape, and is also involved in infringement and invalidity analysis.

Prior to joining the firm, Trupti worked as a patent agent for more than ten years at prominent US law firms. Before practicing patent law, Trupti worked as a Post- Doctoral Fellow at the Johns Hopkins University.
