Practice Focus

Patents (Pharma and Chemistry)

Isha started her patent practice in 2021. She handles inventions in the fields of specialty chemicals, organic chemistry, inorganic chemistry, biochemistry, agricultural products, personal care, and cosmetics.

Given her varied educational background in chemical and petrochemical industry, she has demonstrable expertise in subject-areas such as polymer, chemistry, gas and petrochemicals, material science, metallurgy, pharmaceuticals, and medical diagnostics.

She assists clients in drafting and prosecution of patents. In addition, she supports search and analytics and renders opinions on patentability, freedom-to-operate, patent landscape, and infringement analysis under Indian laws.

Prior to joining the firm, she worked as a patent analyst with a reputed Indian consultant firm.
