Practice Focus

Patents (Pharma and Chemistry)

Kavita is a seasoned patent professional. She began her journey in 2005 and since then is involved in matters pertaining to pharmaceutical and chemical industries.

Her expertise lies in the drafting and prosecution of patent applications, with a focus on organic chemistry, including organic compounds, polymorphs, synthesis, and compositions. She is well-versed in applied chemistry, covering areas such as inorganic catalysts, batteries, metallurgy, adhesives, abrasives, polymers, and pesticides.

She specializes in chemistry and pharma-related patent applications, freedom to operate (FTO) analysis, patent litigation, and IP awareness and training programs.

Her prior experience includes a decade of handling FTO analysis and providing process clearances for API R&D at a leading generic company, as well as managing patent drafting and end-to-end prosecution at a Chennai-based IP law firm.

Achievements & Awards

- Gold Medallist in M.Sc at JNTU, Hyderabad.
- Certificate of appreciation for contribution in development of montelukast sodium, while working with R&D at Dr. Reddys.
