Practice Focus

Mechanical Engineering, Design, Patent & Design Valuation

Revanth handles patent drafting, filing and prosecution in the areas of mechanical engineering, automotive engineering, manufacturing engineering, and horology. He also handles filing, and prosecution of Industrial Designs.

He has experience in handling patent matters in wide technology areas including automotive components, suspension & braking systems, safety devices for automobiles, engine air filters, membranes, exhaust aftertreatment, HVAC, chassis structures, body structure, IC engine technology, and geofencing & security systems in vehicles.

His experience of handling patent matters also covers areas of metallurgy, mineral processing, horology/watch manufacturing, renewable energy source, biomedical equipment/devices, furniture, lighting assemblies, and warehouse management solutions.

He also assists clients in respect of patentability searches, freedom-to-operate (FTO) opinions and advises on designs protection as well.
