Practice Focus

Mechanical Engineering, Design, Patent & Design Valuation

Sandesh has been working in the field of Patents since 2015. He handles patent drafting, filing and prosecution in the areas of mechanical engineering, robotics, metallurgy, energy engineering and 3D printing and automotive including electrical vehicles (EV), battery technology, charging technologies, advanced driver assistance systems (ADAS), safety devices for automobiles, engine air filters, and membranes. He also handles filing, prosecution, and contentious matters relating to industrial designs.

He also has extensive knowledge and experience in handling patent matters and provides opinions on patentability, freedom-to-operate, due diligence and infringement analysis, and manages patents and design portfolios for Indian and foreign clients.

Drawing from his techno-legal and business-oriented expertise, he further provides strategic advice and opinions to clients dealing with technological areas such as electronics, mineral processing, renewable and non-renewable energy sources, biomedical devices, and warehouse management solutions.

He works with corporate clients, reputed foreign IP law firms, multinationals, MSMEs, start-ups, and universities to obtain patent protection both in India and abroad.

He regularly appears before the Indian Patent Office in connection with prosecution and opposition of patent applications.

Prior to joining the firm, he worked with a renowned tech consulting firm that works in Cloud, AI & Analytics.
