Practice Focus

Mechanical Engineering, Design, Patent & Design Valuation

Shivakumar handles patent drafting, filing and prosecution in the areas of mechanical, automobile, metallurgy and renewable energy engineering. He also handles filing and prosecution of Industrial Designs.

He has experience in handling patent matters in wide technology areas of mechanical engineering, automotive engineering and renewable energy, including wind turbines, HVAC systems, automobile suspension systems, transmission systems, fluid filtration devices, fuel injection systems, exhaust after treatment systems, electrical vehicles (EV) and hybrid vehicles. He also handles patent matters in the areas of metallurgy, mineral processing, material handling systems, heat exchangers and waste management.

In addition, he also has expertise in handling patent matters in the areas of domestic appliances, personal care products, diagnostic imaging systems, ventilator systems and luminaire assemblies.

He also provides opinions on patentability, freedom-to-operate, due diligence and infringement analysis, along with managing patent & design portfolios for Indian and foreign clients.
