Practice Focus

Mechanical Engineering, Design, Patent & Design Valuation

Raghavendra handles patent drafting, filing and prosecution in the areas of automobile engineering, energy engineering, and mechanical engineering. He also handles filing and prosecution of industrial designs.

He has handled cases in the field of automotive components, HVAC systems, autonomous driving assistance technologies, electrical vehicles, exhaust gas after-treatment systems, braking systems, and vehicle suspension systems.

He has also handled matters in the field of metallurgy including blast furnace technologies, mineral processing, detection of defects in various metal forming systems, household consumer products, consumer home appliances, personal care products, ice making machines, biomedical equipment and devices, catheters, mining and earth moving equipment, 3D printing technologies, electro-mechanical equipment, hydrogen fuel cell technologies and un-conventional energy generation devices.

He assists clients in technology sectors such as renewable and non-renewable technologies, wind turbines, horology, smart watches, and hybrid watches.

He also provides opinion to clients on prior art searches, patentability issues, and freedom to operate opinions.
