Practice Focus

Mechanical Engineering, Design, Patent & Design Valuation

Siddhant handles patent drafting and prosecution in the areas of mechanical, automobile & aeronautical engineering. He also handles filing and prosecution of industrial designs. He holds a Masters' degree in Fluid & Thermal engineering which equips him to handle patent matters in power plant technology such as boilers, turbines, thermal storage systems, and solar based equipment.

He has handled matters in the field of automotive components and accessories, automotive lighting, vehicle structures, fuel tank, suspension systems, air-conditioned system, hybrid drive technology, airbags, exhaust system, control panels, IC engine. In addition, he handles matters in household consumer products such as fans, lighting, glass panel structures, lab equipment, medical devices, testing kits, refrigerators, deep freezers, washing units, microwaves, clean air and water technology, textile machine, electric vehicles, battery technology, e-bike, mobility solutions, prosthesis & implants, medical instruments, engine filters, membranes, industrial dust, engine OEM systems, and compressors.

He also assists clients in prior art searches, freedom-to-operate and infringement studies and advises on designs protection as well.

He regularly appears before the Indian Patent Office in connection with prosecution and opposition of patent applications.
