Practice Focus

Mechanical Engineering, Design, Patent & Design Valuation

Bharath handles patent drafting, filing and prosecution in various technological areas including mechanical engineering, automotive engineering, metallurgy, energy engineering, manufacturing engineering, robotics, and horology. He also has experience in handling wide fields of mechanical engineering and automotive engineering including electrical vehicles (EV), battery technology and charging technologies, exhaust aftertreatment systems, autonomous driving assistance system (ADAS), vehicle suspension and braking systems, safety devices for automobiles, and battery module for maritime vehicles.

His experience of handling patent matters also cover areas of alternative technology such as 3D printing technology, non-renewable energy sources and systems, jewellery production and manufacturing, waste management and recycling, and biomedical devices.

He also advises clients on various aspects pertaining to patenting of technology including patentability searches, freedom-to operate (FTO) opinions, infringement analysis and due diligence. Besides, he actively manages patents and designs portfolios of corporate clients, multinationals, MSMEs, start-ups, educational Institutes, and universities.

In addition to handlings patent related technology of a wide clientele, he also handles filing and prosecution of design applications.

He regularly appears before the Indian Patent and Designs Office in prosecution matters and hearing proceedings.
