Practice Focus

Patents (Pharma and Chemistry)

Rohan Pandey is an Associate, based out of Gurgaon, where he works with the Pharma & Chem team. Rohan handles inventions in the fields of chemical engineering, inorganic chemistry, agricultural products, personal care, organic chemistry and cosmetics.

Given his diverse educational background in chemical engineering and PG in Data science, Rohan has demonstrable expertise in subject-areas such as automation including chemical engineering models, polymer, chemistry, gas and petrochemicals, material science, metallurgy, pharmaceuticals, and medical diagnostics. He also handles inventions related to mechanical engineering and automobiles, with a focus on chemical engineering and automation.

Rohan assists clients in patentability search, landscape analysis, Freedom-to-operate assessment, and infringement analysis. He assists clients in drafting, filing and prosecuting patents in both Indian and foreign jurisdictions.

Prior to joining the firm, he worked as a Patent Analyst for almost two years at a prominent Indian law firm.
