### Practice Focus

Patents (Biotechnology and Biosciences)

Nikhil is a registered Indian Patent Agent with around three years of experience in the field of intellectual property. He works on patent matters related to Biotechnology, Molecular Biology, Pharmaceuticals, Immunology, Nanotechnology, Fermentation and Industrial processes, Agro-tech, and related areas. He has interest in newly evolving niche areas like Hybridoma, CRISPR, CAR-T Cell technologies etc.

His practice includes conducting patentability searches, end to end drafting, filing and prosecution of patent applications, responding to examination reports, and attending to hearings at the Indian Patent Office. He also assists the litigation team on the technical side for pre- and post-grant oppositions, appeals etc.

He is also involved in international filings (PCT and Paris Convention) as well as prosecution in other countries like US/Europe etc.

Prior to joining K&S Partners, he contributed to academic research projects in life sciences and has a good understanding of Molecular biology, Microbiology, and Bioinformatics, which supports his proficiency in handling IP matters in this domain.

He has keen interest in writing articles and making presentations on case laws by deep diving into the matter.
