Bengaluru

Practice Focus

Computers and Electronics

Anna possesses professional experience in patent drafting, filing, and prosecution across a wide range of technological domains, including telecommunications, mechanical devices, medical devices, artificial intelligence-based inventions, electronics, semiconductors, and battery systems. She has experience in drafting complete patent specifications and preparing responses to First Examination Reports (FERs) before the Indian Patent Office across multiple technology areas.

Her work also includes conducting detailed and quick prior art searches, including freedom-to-operate (FTO) and invalidity searches, using patent databases and analytics tools. She has expertise in managing end-to-end patent filing procedures, including Indian national applications as well as Patent Cooperation Treaty (PCT) applications, along with the preparation of statutory forms, written submissions, and post-hearing documentation.

In addition, she collaborates with clients to understand technical disclosures and support during patent prosecution, and in matters relating to post-grant procedures and compliance.
