Practice Focus

Patents (Computers & Electronics)

Akshith is engaged in drafting patent applications, prosecuting applications across major patent offices. His work also includes attending patent hearings.

Akshith has experience across broad-based and diverse technology domains, including electronics, electrical systems, semiconductors, power electronics, digital systems, computer networks, wireless communication, artificial intelligence, machine learning, IoT, blockchain technologies, automation, smart devices, computer hardware, biomedical systems, medical electronics, aeronautics, cloud computing, data centres, and software-based inventions. His combined technical and legal expertise enables him to efficiently handle complex and interdisciplinary patent matters.

He has rich experience in IP prior to working with K&S Partners. His multidisciplinary background allows him to deliver precise, technically sound, and strategically aligned IP solutions across a wide spectrum of technologies.
