Practice Focus

Patents (Computers and Electronics)

Jayalakshmi has over eight years of experience in patent drafting, prosecution, and advisory services across diverse technology domains. Her expertise spans electronics and wireless communication, display technologies, and consumer electronic devices.

She regularly handles patent drafting, prior art searches, patentability assessments, freedom-to-operate (FTO) analyses, and invalidity studies, providing strategic and well-reasoned opinions to clients.

Jayalakshmi has extensive experience in a broad range of technologies, including telecommunications, digital signal processing, image and video processing, 4G/5G communications, mobile applications, wired and wireless systems, semiconductor devices, antennas, sensors and transducers, electric vehicles, artificial intelligence, machine learning, neural networks, Internet of Things (IoT), virtual reality (VR), augmented reality (AR), Advanced Driver Assistance Systems (ADAS), and vehicle monitoring technologies.

She works closely with corporate clients, multinational companies, foreign associates, MSMEs, start-ups, educational institutions, and universities to secure patent protection in India and across international jurisdictions.
